

To: Education Committee Co-Chairs: Rep. Robert Sanchez & Sen. Doug McCrory

RE: H.B. 7352

I fully support the proposed bill to incorporate climate change curriculum at the grammar school level. Giving the children tools early on to recognize what climate change is and what they can do at their level to slow the advance of climate destruction is essential for their future.

I believe this bill is vital for the future of my children, my grandchildren and for generations to come. They are not responsible for the situation we are in, we are. PLEASE ACT NOW!
